Cyber Bullying

What you should do

- What you should do if you are being cyber bullied, is you should tell an adult or an older brother or sister about it.

Passwords

- What you should do if you're consistently being bullied, is to put a strong password on your stuff and, don't tell anybody it, even your closest friends!

Don't trust strangers

- If you get an email from someone you don't know then you should just recycle their email and forget them and if they keep on sending you email non stop then just remove them from your contacts list.

Speaking up

- If you know anybody that is being cyber bullying than you should speak up. Also you can join Cartoon Network and speak up for other kids like your self.

The end of my advice
