

Online Safety

By: Hydelfonzo Majalca

Online Safety

Be safe online by reporting people who are cyber bullying. You should not say mean stuff to other people because you will get cyber bullied back or you would get reported for cyber bullying.

Be Smart Online!

You can also be safe by having a strong password for your account. You should also add an E-mail you can get into because if you forget your password or someone changed your password you can send the password to the E-mail you added and you will get your password back!
