

# How A Computer Works

By Sydney M5

A series of horizontal stripes in various colors (yellow, green, blue, purple, orange, red, white, green) running across the bottom of the page.

# What Is a Computer?

Lots of people use **computers**.  
**Computers** are used to browse the  
**internet**.**The internet** is **websites**,  
websites are used to spread information or  
for people to **post** a **blog**. Everyone uses  
computers.

# Blogs

A **blog** is a website about people. People use blogs to tell people things about them or something about other people. Many people use blogs. Would you make a blog?

# What is Email?

**Email** is an abbreviation for “**internet mail**”. Email is used to contact friends or family online. Sometimes you get mail from someone **you** don't know. That is called **spam**. **Do you have an email account?**

# Online Messaging

**Online messaging** is how you can speak with friends. However, online messaging only works with internet, like other online activities. Online messaging with friends is safe. Chating with people you don't know is dangerous.

# Most people know computers!

If you are reading this, you must know about computers. If not, please read all six pages beginning to end. Computers help, computers tell. Most people know computers!
